De-risking smart metering with a MaaS approach

How a holistic approach to smart metering can save you from biting into the unexpected!

Tanya Dady & Richard Channell

Jelly Beans!

Smart metering price control deliverables (PCD)

// An active meter must record water consumption at least once per hour with a success rate of 95% or higher. //

// Transmit the recorded consumption data at least once every 24 hours with a success rate of 95% or higher. //

Smart Metering: A risky game

Will it leave a bad taste in your mouth?

Smart metering's critical ingredients
